

PROJECT UPDATE

FEBRUARY 28, 2019

Riverton Appears Before SERA on Feb. 28 to Discuss Concept Plan

Kevin Polston, project executive for Riverton, presented the concept plan for the 418-acre redevelopment site, which includes about 310 “developable” acres of land.

The latest plan, which can be modified, calls for retail space of 1.3 million square feet, office/commercial space of 2 million square feet, hotel/conference space of 622,000 square feet and 2,000 residential units. Polston said it is expected a groundbreaking will occur in the latter part of this year.

The entire project will be phased in over a number of years.
